Design Information	
Pavilion facets	44
Girdle facets	16
Crown facets	24+1
Total facets	89
Index gear	96
Symmetry	1-fold mirror image
RI range	1.54 to 2.30
RI diagram	1.80 to 2.30
L/W = 1.000	T/W = 0.713
U/W = 0.713	P/W = 0.502
C/W = 0.167	V/W <sup>3</sup> = 0.245

Note: Frosted facet indexes are indicated by **bold** text in the cutting instructions. I recommend cutting this design in light color-saturated rough so the frosting and extinction stands out. I suggest only cutting it in a large stone and taking your time cutting the pavilion facets. Some tiers have similar angles and indexes, **be gentle**. Angle set "A" has a higher crown to help generate the edge patterns. You can use angle set "B" at low RI but the edge patterns will not be as nice.
